REJECTIONS OF CLAIMS BASED ON FORMAL MATTERS

The following is a quotation of the second paragraph of 35 U.S.C. ' 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under **35 U.S.C. ' 112, second paragraph**, as being **indefinite** for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term “winding end” in claims 1 and 4 has no meaning since it is not associated with any previously recited part of the article. It is suggested that the word “opposite” should be inserted after “winding”.

There is no antecedence in the claims to the pressed state of the sheet and article recited in line 3 of claim 3.

REJECTIONS OF CLAIMS BASED ON PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. ' 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-11 are rejected under **35 U.S.C. ' 102(a)** as being anticipated by the patent to Japanese reference 2003-026113 (cited by applicant). The '113 reference discloses a method and

apparatus of packaging a rolled article by gripping a side edge of said packaging sheet by grippers 560 and feeding the packaging sheet from the side edge thereof to a winding position to position the packaging sheet in the winding position (502, Figures 22-24&41), positioning said rolled article with respect to said packaging sheet in said winding position (Figure 1), attaching an end of said packaging sheet to an end of said elongate sheet of said rolled article (504), rotating said rolled article while gripping a winding end of said packaging sheet to wind said packaging sheet around said rolled article (508 and Figures 26,27&43) and mounting said skirt-members on said end packaging members while pressing the end packaging members against respective opposite ends of said rolled article (686).

The cited prior art is made of record but has not been relied upon in the rejection of claims. However, the prior art is considered pertinent to applicant's disclosure.
